- Snehal Lohar- 20102A0037

under the guidance of

Prof. Amit Aylani

Introduction

Our website provides an integrated view of all the products of the available trusted websites. This integrated view allows users to view products from different websites in a single portal. It's easier for users to compare products and buy the one that works best for them.

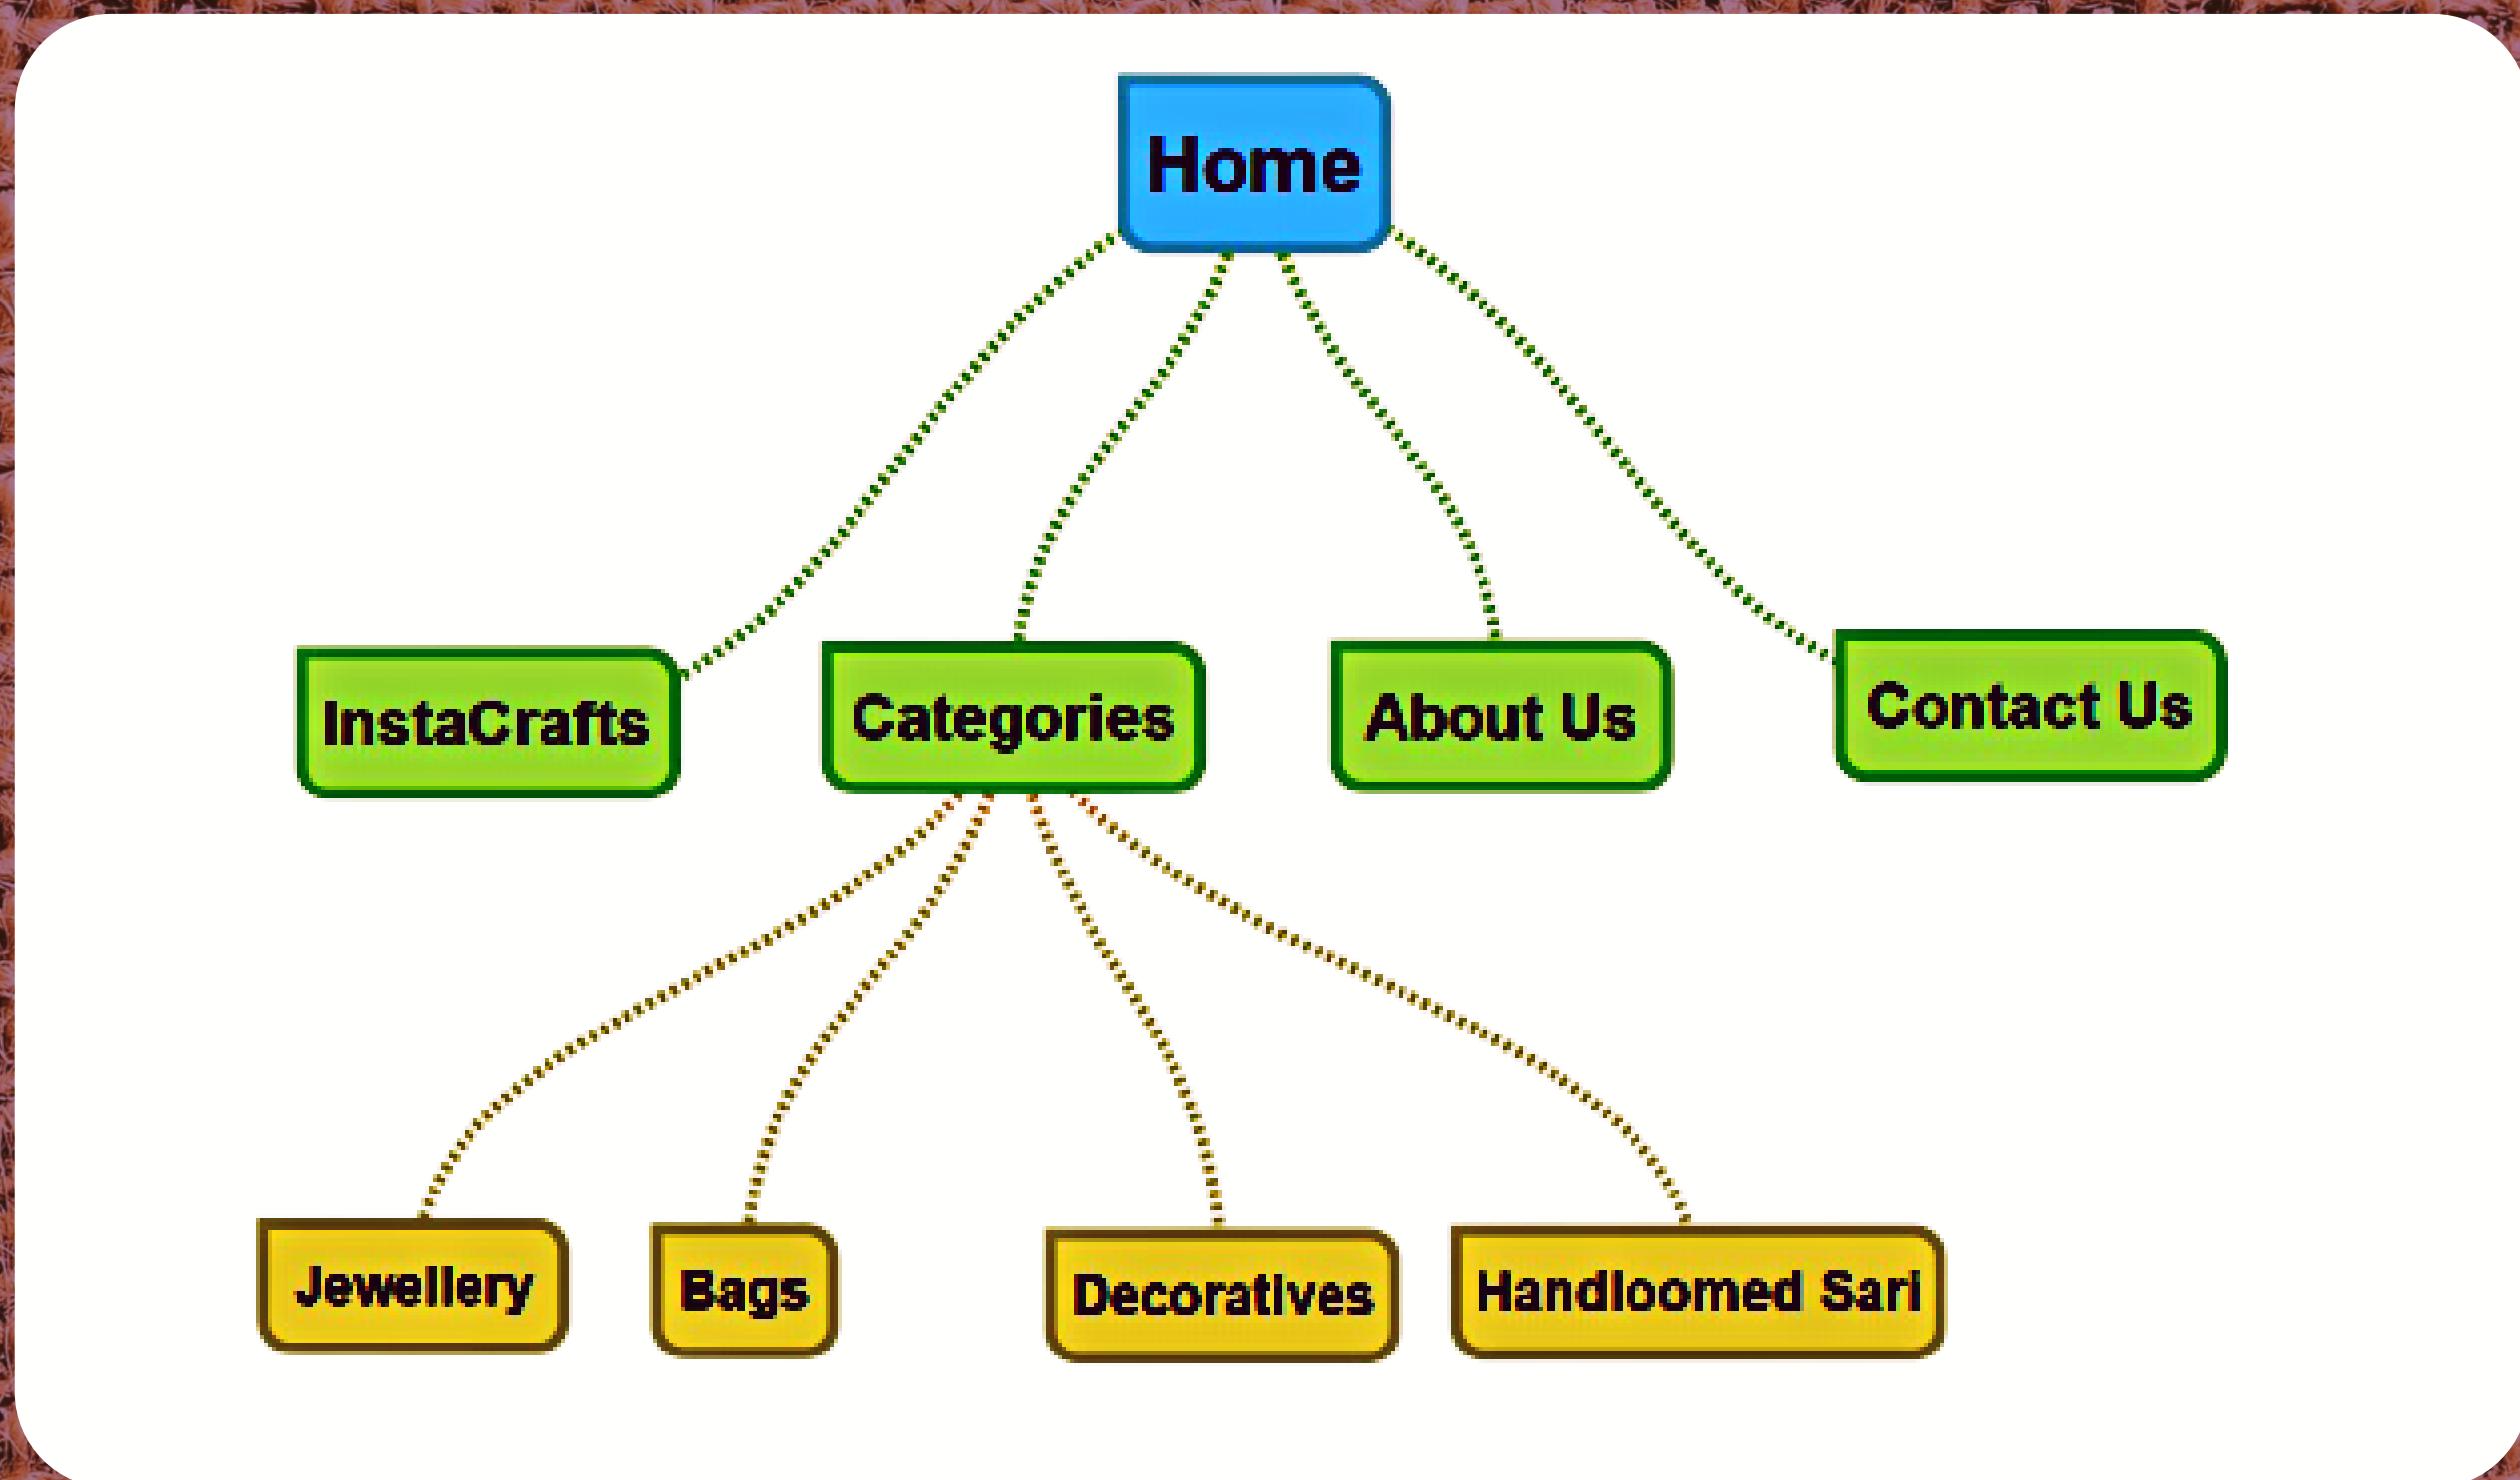

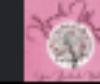

Problem Statement

During the entrepreneurial wave era, many new start-ups came up. Many rural areas began selling handmade products, which helped them grow financially and gave them artistic recognition. At present, very few platforms focus on handicrafts.

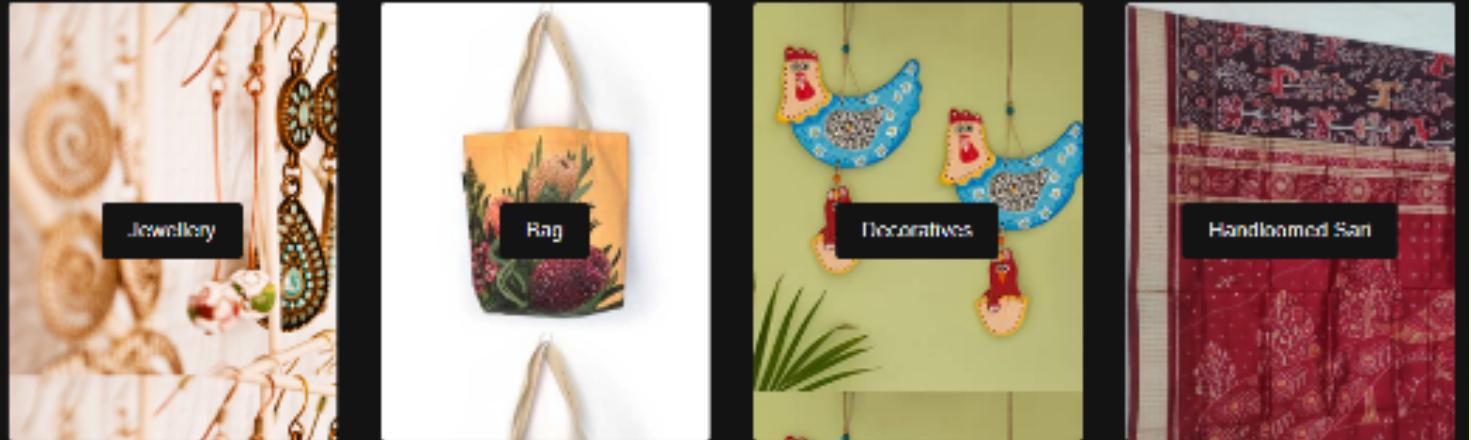

To help such people, we have developed a website that primarily focuses on handicrafts and makes people aware of websites and social media handles that sell only handicrafts.

About Us

Welcome to Handiworld!

Handmade pieces show the power of the human spirit and its propensity to create. When you support artisan-made pieces, you also support the craft skill they practice. By supporting skills like silversmithing, basket weaving, or glassblowing, we are helping them to pass the skills to the next generation. And when we buy handmade, we affirm to kids like Pancho 2 and Alejandro that their craft is not only beautiful, but it is also profitable, and therefore, worth preserving.

Handiworld is not just about money. Each purchase, gives the artist, the maker, the crafts person as well as those small websites or shops who sell handmade products a confidence in their product, chance to develop their skills further, opportunity to re-invest the money back to their business and carry on producing beautiful works of art. We aim to make this world more greener and ozone-friendly to live in. Decorate your homes with nature made products.

Our HandiWorld Team wishes you Happy Shopping!

About Us

On this page, is the objective of the handiworld team.

The screenshot shows the InstaCrafts website interface. At the top, there's a navigation bar with links for Home, Categories, About us, Contact us, InstaCrafts (which is highlighted in purple), and Login. A dropdown menu is open over the InstaCrafts link, displaying three Instagram handles: gaatha.handicrafts, kutchihandicraft, and handicrafthalt. Below this, there's a large image of a traditional Indian earring with intricate designs. On the left side of the page, there's a sidebar with a logo and some text. The main content area shows two Instagram profiles: 'kutchihandicraft' and 'handicrafthalt'. Each profile has a thumbnail, the number of posts, followers, and following, a bio, and a 'Follow' button. Below each profile, there are sections for Posts, Reels, Videos, and Tagged, followed by a search bar and a login/signup button.

InstaCrafts

An option is created for Instagram users who buy handicraft items. On clicking, the customer is redirected to the respective Instagram page.

Conclusion

Team Handiworld hopes to have many people accessing the website and fulfilling their needs. The website is user-friendly. We tried our best to implement it in the best possible way.

Future Scope

1. Portal for local vendors
2. To add affiliate links.
3. More categories of products
4. Database connectivity for login and signup
5. Controlling Website Traffic
6. Compare similar products based on price and reviews
and recommend the best ones to customers.
7. Location API to locate nearby handicraft stores.

THANK YOU
